

TRILLIX SITE REVIEW

trillix.com as an Argentine player sees it: language, sign-up, welcome offer and promotions, cashier, lobby and game content, legal pages and the affiliate surfaces. Each part is compared with the ten market standards from the Argentine competitor sweep (JugaBet, Brazino777, 1win, 22bet, 1xBet, Melbet, Stake).

1 of 10

market standards fully met

7 of 10

partly met

Argentine front-row slots already live

7 fields

of profile data before Mercado Pago opens, after sign-up

A FINISHED EUROPEAN CASINO, NOT YET AN ARGENTINE ONE

trillix.com is a complete product: 17,079 games from 108 studios, a three-deposit welcome ladder with the terms printed on every card, a loyalty programme with a cash store, a short sign-up, an Anjouan licence seal that validates, and legal pages written for the right company. It opens in English and in euros for an Argentine visitor.

- **The content is Argentine already.** The popular row opens on Aviator, Gates of Olympus 1000, Joker's Jewels, Fortune Tiger, JetX and Sweet Bonanza 1000; Chicken Road, Ice Fish, Balloon, Aviatrrix and Spanish-dealer blackjack are in the catalogue. Nothing to license, only to arrange.
- **The money is European.** EUR is pre-selected at sign-up, every bonus is in euros, the welcome minimum is €20 (about ARS 34,000 against a market floor of ARS 3,000 to 5,000), the maximum bet is €5 and the bonus expires in 7 days.
- **The language is not Argentine.** No automatic switch to Spanish, neutral Spanish in the usted form where it exists, English banners and bonus names on the Spanish pages, English legal pages, and spelling slips in the two most visible buttons.
- **The cashier is crypto first, pesos second.** An ARS account sees Mercado Pago, twelve crypto wallets and a card-to-crypto invoice; every live method opens at ARS 33,879 (€20). Mercado Pago, the only peso rail, is locked until the player fills first name, last name and phone in the profile. Payments are still being installed, so the rail list is provisional and untested.
- **The real registration hides behind the cashier.** Sign-up asks for e-mail and password; the profile page then demands first name, last name, gender, date of birth, country, phone and the password again before the peso rail works. Nothing warns the player before the deposit screen.

What is good and should stay: the licence seal with its validation link, the own terms dated 1 July 2026 with the right company and licence, the promo-code field, the two-consent sign-up with only email and password, the terms printed on each bonus card in Spanish, the bonus choice at sign-up, demo play for guests, the loyalty store, and the front row of games.

The ten fixes that matter most

#	FIX	WHEN
1	Open in Spanish with ARS pre-selected for Argentine visitors; every bonus, limit, banner and help text in pesos.	Before traffic
2	Set the minimum deposit at ARS 5,000 on every method and on every bonus (today ARS 33,879 on every live method and €20 on the welcome ladder); quick buttons 5,000 / 20,000 / 50,000.	Before traffic
3	Rebuild the welcome as an Argentine ladder: caps in pesos (market total ARS 600,000), wagering x30 to x35 over 30 days, a crash pack where crash counts, a casino pack; keep the Thursday reload but gate it on deposit count; add a weekly cashback.	Before traffic
4	Test the cashier with real peso money: Mercado Pago and CBU/CVU through the configured provider, USDT TRC-20, deposit and withdrawal, success rate per rail. Publish payout times. Review the 8% fee on unwagered deposits before an affiliate reads it.	Before traffic

#	FIX	WHEN
5	Make sign-up one screen: bonus choice and form together, ARS and +54 pre-filled, the offer in pesos on the form; keep the promo-code field and both consents. Collect first name, last name and phone there (or at first withdrawal), never as a surprise inside the cashier.	Before traffic
6	Rewrite the Spanish in Argentine voseo, translate the banners, bonus names and legal pages, fix "Regístrarse" and "Proximo".	Before traffic
7	Put a curated Crash row in the menu (Aviator, Chicken Road, Ice Fish, Balloon, JetX, Mines, Plinko, Aviatrix), move Chicken Road out of "Other", add a "Mesas en Español" row, switch tournaments on with provider-funded events.	Before traffic
8	Stand up the mirror-domain pool, the APK and PWA, and the block runbook; test load time from an Argentine connection.	Before traffic
9	Trust layer: WhatsApp support in Argentine Spanish next to the chat widget, payment-method logos in the footer, an 18+ gate, deposit limits next to self-exclusion.	Month 1
10	Affiliate surfaces: replace the vendor template on partners.trillix.com (Lorem ipsum FAQ, old Curaçao terms that list Argentina as restricted), publish the affiliate terms, confirm link format, sub-IDs and deposit amounts in postbacks.	Before traffic

SCORECARD AGAINST THE 10 MARKET STANDARDS

The ten standards distilled from the Argentine competitor sweep. For each one: what trillix.com shows today.

#	MARKET STANDARD	STATUS	WHAT TRILLIX.COM SHOWS (6 OCTOBER)
1	Welcome as a three- or four-deposit ladder with an ARS total cap	Partly	A three-deposit ladder exists (100% to €500, 75% to €750, 50% to €1,000), but every cap is in euros and the minimum is €20.
2	Wagering published in Spanish, one dated bonus policy, maximum win stated	Partly	Every bonus card prints wagering (x40), max bet (€5), max win (€2,000 or x10) and expiry (7 days), also in Spanish. No bonus policy page; the terms refer to "Terms of Bonuses" that are not linked.
3	Small minimum deposit in pesos, ARS 3,000 to 5,000	Missing	ARS 33,879 (€20) on every live deposit method and on the welcome offer: seven to eleven times the market floor. Mercado Pago minimum not shown yet (rail locked, payments still being installed).
4	Welcome packs by game type, matched to the traffic	Missing	One pack, slots only. Live, table and crash games count 0% toward wagering, so a crash player gets nothing from the welcome.
5	Retention offers unlocked by deposit count; cashback by activity	Partly	Thursday 50% reload (not gated), a loyalty programme with 11 levels and a cash store. No cashback, tournaments "coming soon".
6	Promo-code field at sign-up	Done	"Promo code" on step 2 of sign-up.
7	One-step sign-up with pesos pre-filled and the offer on the form	Partly	Two steps: choose the bonus, then e-mail, password, currency, promo code and two consents. Short, but EUR is pre-selected (the list runs EUR, USD, CAD, AUD, BRL, ARS last) and the offer is in euros. Seven more profile fields wait inside the cashier.
8	Standard lobby: Argentine slots, crash row, Spanish live tables, tournaments, jackpots	Partly	Front row is the Argentine list. The Crash category exists but is not in the menu and opens on filler titles; Chicken Road sits in "Other"; 19 Spanish blackjack tables and 2 Spanish roulettes exist without a row; tournaments are off.
9	Argentine Spanish everywhere, pesos everywhere	Partly	Spanish exists but does not open automatically; neutral Spanish in the used form; banners, bonus names and legal pages in English; euros everywhere.
10	Trust: licence seal, published payout times, WhatsApp support	Partly	Anjouan seal with validation link, own legal pages, a chat assistant widget and a contact form with a 24-hour promise, document upload for KYC. No payout times, no WhatsApp, no payment logos.

Reading the score. Trillix scores where most new entrants do not (content, legal pages, a short form) and fails where a European build always fails in Argentina: currency, minimum deposit, language. All three are

configuration and copy, not product work.

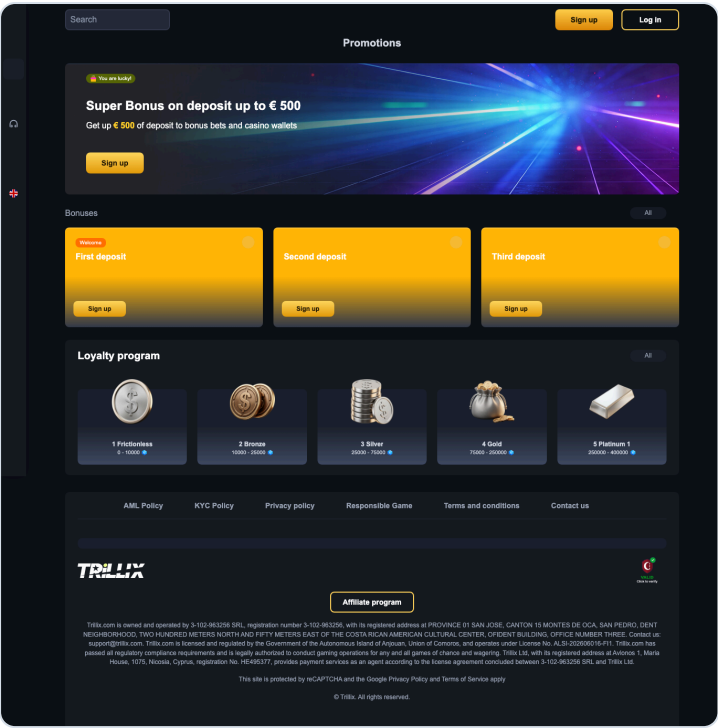

FOUR BONUSES, ALL IN EUROS, NONE ARGENTINE

The promotions page carries the welcome ladder, a Thursday reload and the loyalty programme. The terms are printed on each card, which is better than most offshore competitors. The numbers are the problem.

BONUS	MATCH	CAP	MIN DEPOSIT	WAGERING	OTHER TERMS
First deposit	100%	€500	€20	x40 bonus	Slots 100%; live, table and crash 0%; max bet €5; max win €2,000 or x10; 7 days
Second deposit	75%	€750	€20	x40 bonus	same
Third deposit	50%	€1,000	€20	x40 bonus	same
Thursday Bonus	50%	€500	€20	x40 bonus	every Thursday; shown as "Unavailable" to guests
Loyalty programme	11 levels from Frictionless (0 to 10,000 points) to Obsidian (6,000,000+); points for bets, swapped for cash in the store				

Against the market

- **Minimum deposit.** €20 is ARS 34,000. JugaBet asks ARS 3,000, Brazino777 3,500, 1win 4,500, Stake 3,000. An Argentine affiliate click that lands on a €20 minimum does not deposit.
- **Expiry and wagering.** 7 days at x40 is the tightest combination in the market: JugaBet gives 30 days at x35, Brazino777 x30. The headline sum (225%) matches Brazino777 exactly, so the structure is right.
- **Crash at 0%.** Brazino777 does the same; JugaBet sells a crash pack at x40. For a crash-led launch the welcome needs a crash version, or the crash player is bought for nothing.
- **Retention.** No cashback at all; the market runs two at once (JugaBet weekend slots cashback 30%, Brazino777 weekly cashback up to 12% by days active). The Thursday reload should be gated on deposit count as Brazino777 gates its Monday booster (3+ deposits).
- **Banners.** "Super Bonus on deposit up to € 500", "Instant crypto deposits and payouts" and the loyalty banner are English on the Spanish site and lead with crypto. The Argentine banner leads with pesos, Mercado Pago and the crash games.
- **Inside the account.** A new player is offered two bonuses only: First deposit (auto-subscribed at sign-up, selectable again in the cashier) and the Thursday reload, locked as "Unavailable". The second and third deposit bonuses from the public page are not offered to the account yet. The dashboard carries a promo-code box. The loyalty store sells cash in euros on a peso account (€20 for 2,000 points up to €1,000 for 100,000), all marked unavailable, and the Levels page returns a data error.

Promotions page, English: the three-deposit ladder, the Thursday reload and the loyalty levels, all in euros.

WELCOME OFFER: TRILLIX AGAINST THE MARKET

Offshore competitors' terms as published on their live sites (Argentine connection, 29 September and 2 October 2026); Trillix as of 6 October.

BRAND	WELCOME	MIN DEPOSIT	WAGERING	NOTES
Trillix	100% / 75% / 50% to €500 / €750 / €1,000, plus Thursday 50%	€20 (ARS 34,000)	x40 bonus, 7 days, max bet €5, crash and live 0%	terms on the card in Spanish; one pack, slots only; no cashback
JugaBet	4 packs chosen at registration (sports, slots, live, crash); 100% / 125% / 150%, headline 375%	ARS 3,000	casino x35, 30 days, max win x10; crash and live x40	Argentine-native, voseo throughout, ARS or USDT
Brazino777	100% / 75% / 50%, caps ARS 150,000 / 150,000 / 300,000	ARS 3,500	x30; crash and live 0%, tables 5%	one-step four-field form with ARS pre-filled; Monday reload gated on 3+ deposits; Anjouan licence, Mercado Pago through an aggregator
1win	4 deposits 100% / 120% / 130% / 150% plus 70 to 180 free spins; crypto 600%	ARS 4,500	wagering inside the account	pushes Aviator hardest in Argentina
22bet	casino 4 deposits to ARS 1,875,000 + 150 free spins	ARS 12,500 casino	x35, 7 days, max bet ARS 6,250	Rapipago and Pago Fácil instant
1xBet	300% to ARS 775,000 over 4 deposits	ARS 2,000 sports / 13,000 casino	games x30, 30 days	best-localised offshore site: voseo, ARS, Mercado Pago out in about 2 hours
Melbet	100% / 150% / 200% to ARS 1.22M + 220 free spins	ARS 2,000	x40, 7 days	richest crash shelf
Stake	no classic welcome; rakeback and races	ARS 3,000	none	Buenos Aires Province licence since June 2026

Where ARS 5,000 sits. The minimum we set across the Argentine launches is above JugaBet, Brazino777 and 1win and below the 22bet and 1xBet casino packs; at the site's own rate it is €2.93 or \$3.29. It makes every first deposit a paid, qualified FTD. Trillix's €20 is the 22bet level without 22bet's cash network.

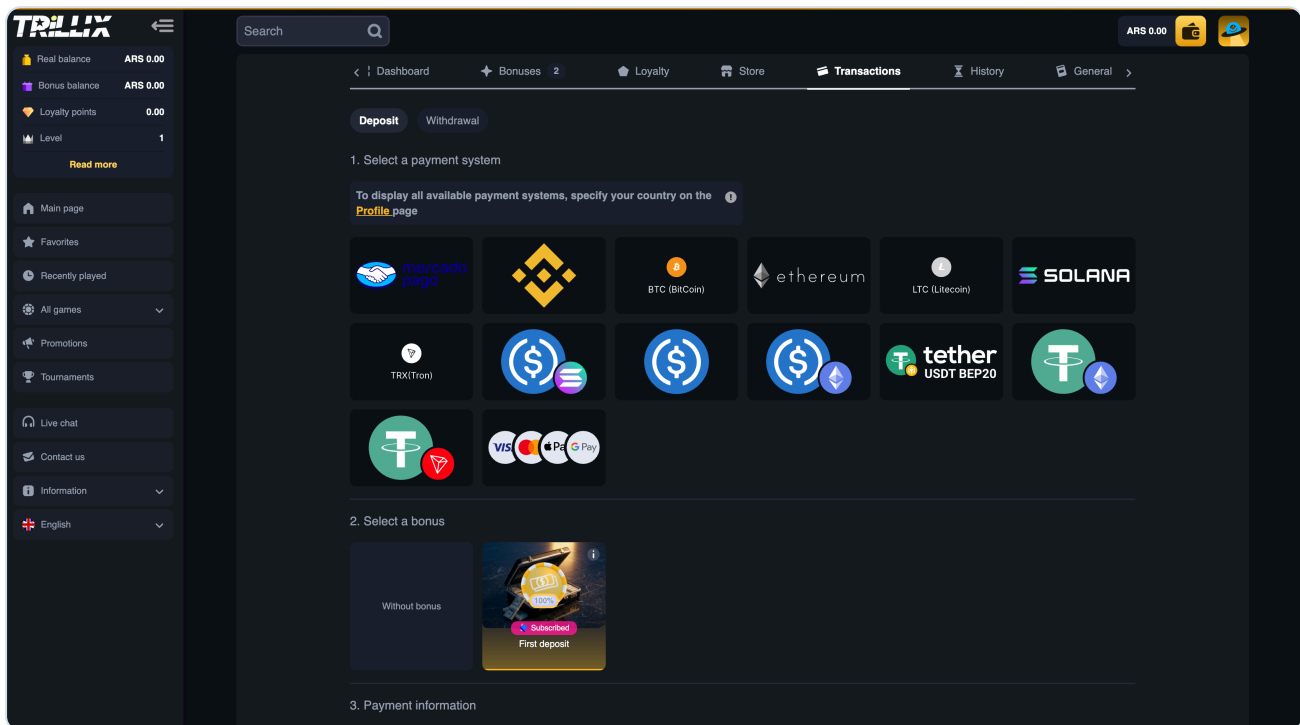

CRYPTO FIRST, PESOS LOCKED BEHIND THE PROFILE

The cashier of an ARS account on 6 October. Payments are still being installed, so this is the state of the build, not the launch cashier. Six currencies at sign-up (EUR, USD, CAD, AUD, BRL, ARS); Argentina is not on the excluded-country list.

METHOD	SHARE OF ARGENTINE CASINO DEPOSITS	ON TRILLIX TODAY	WHAT THE CASHIER SHOWS
USDT (TRC-20)	about 25%	Live	Also BEP-20 and ERC-20, plus USDC on three networks, BTC, ETH, LTC, SOL, TRX, BNB: twelve crypto wallets. Deposit shows a personal address and QR at once; minimum ARS 33,879 (€20), maximum ARS 17,052,220 (€10,000). Withdrawal: amount and wallet address, minimum ARS 17,052 (€10), maximum €10,000.
Mercado Pago	about 20%	Locked	First tile on both tabs, in pesos. Deposit: "unavailable, add first name and last name"; withdrawal also wants a phone number. Minimum, fields and flow not shown until the profile is filled; Mercado Pago rejects transfers to unlicensed casinos, so the provider's intermediary accounts carry the rail. Test with real money, measure success per attempt, ask for the rolling reserve and settlement terms.
Bank transfer CBU / CVU / alias	about 10%	Inside Mercado Pago entry	The configured provider entry is "CBU/CVU Mercado Pago ARS"; whether a plain transfer is offered separately is not visible yet. From January 2027 the central bank's risk score reaches every bank and wallet; a second provider keeps the rail alive.
Cards (Visa, Mastercard, Apple Pay, Google Pay)	about 15% (local cards)	Via invoice	One tile, a card-to-crypto invoice from an on-ramp provider, minimum ARS 33,879, deposit only. International card economics: 30% tax perception, chargebacks. Secondary rail at best.
Rapipago / Pago Fácil cash	about 10%	No	Add through an aggregator (PayRetailers type) for the unbanked share of crash players.
PIX, Interac	0%	Configured, hidden	Brazil and Canada rails in the platform configuration, not shown to the ARS account. Keep them hidden.

What the terms say about money

- **Minimum withdrawal** €10 per transaction (the cashier shows ARS 17,052); withdrawals go back to the deposit method; KYC (photo ID, address, selfie or call) may be asked before any withdrawal. Verification is a document upload on the profile (passport or ID card plus a selfie).
- **Unwagered deposits** pay an 8% fee with a €4 minimum if the deposit was not rolled over once. Affiliates and players read this clause as a withdrawal trap; publish it plainly or remove it.
- **Monthly cap** €10,000, or €5,000 when the balance is ten times the deposits. Fine for Argentine tickets.
- **No payout times** anywhere; the crypto deposit text promises credit "after several transaction confirmations" and nothing is said about withdrawals.

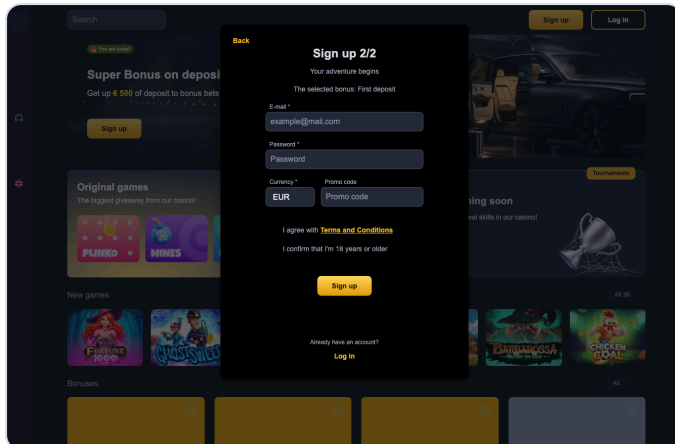

Deposit tab of an ARS account: Mercado Pago, twelve crypto wallets, the card invoice, and the notice asking for the country on the profile page.

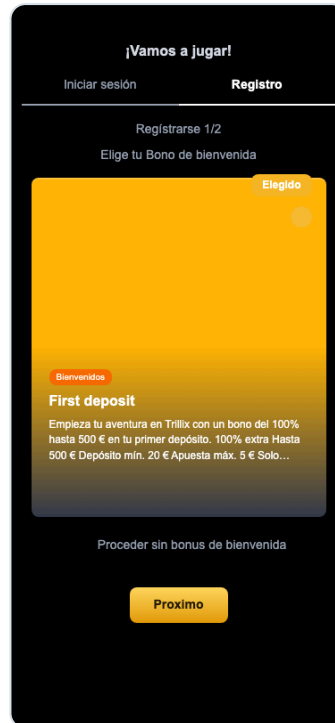

The gate that decides launch is conversion, not existence. The best Argentine rail we have measured on another brand converted 15% of deposit attempts. Before affiliates send volume: real ARS 5,000 deposits and withdrawals on Mercado Pago and USDT, from an Argentine device, with the success rate written down per rail. A rail under 40% in the test week is fixed or removed. Today the peso minimum is ARS 33,879, so the test itself cannot run at the market ticket until the minimum is changed.

TWO STEPS, THREE FIELDS, EUROS PRE-SELECTED

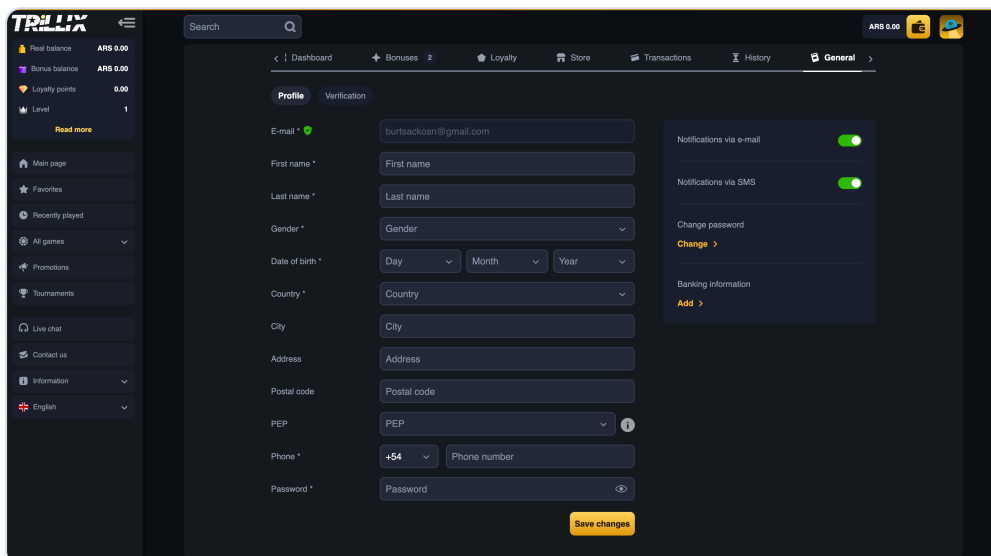

Sign-up opens on "Sign up 1/2: select your welcome bonus" with the first-deposit card selected and a "proceed without a welcome bonus" box, then "Sign up 2/2": e-mail, password, currency (EUR), promo code, "I agree with Terms and Conditions", "I confirm that I'm 18 years or older". Login is e-mail and password.

Step 2 of 2: three fields and a currency that opens on EUR for an Argentine visitor.

Step 1 on a phone, Spanish: the bonus card is still named "First deposit", the button reads "Proximo".

The profile page after sign-up: the fields marked with a star are required before Mercado Pago accepts a deposit.

- **What is right.** Three fields is the Brazino777 benchmark (email, username, password, currency). No name, surname, phone or address before the first withdrawal. The promo-code field is there. Consents are explicit.
- **What costs deposits.** EUR pre-selected and ARS last in the list (EUR, USD, CAD, AUD, BRL, ARS): an Argentine who misses the dropdown ends up with a euro wallet. The bonus choice adds a screen before the form; on a phone it

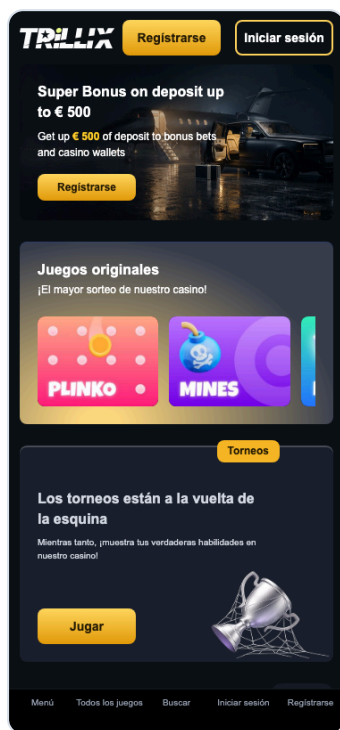

is a full scroll. The offer is shown in euros.

- **The second form.** After sign-up the profile page asks for first name, last name, gender, date of birth, country, city, address, postal code, PEP status, phone and the password again; seven of them are mandatory. The cashier opens without them for crypto, but Mercado Pago refuses until first name, last name and phone are saved, and the cashier only says "specify your country on the Profile page". The player who came for pesos hits a wall on the deposit screen.
- **Change.** One screen with the bonus cards above the form; ARS pre-selected from the country the platform already detects; the offer on the form in pesos; first name, last name and phone collected on that form (three more fields) or at first withdrawal, so the peso rail works on the first visit to the cashier; keep the rest.

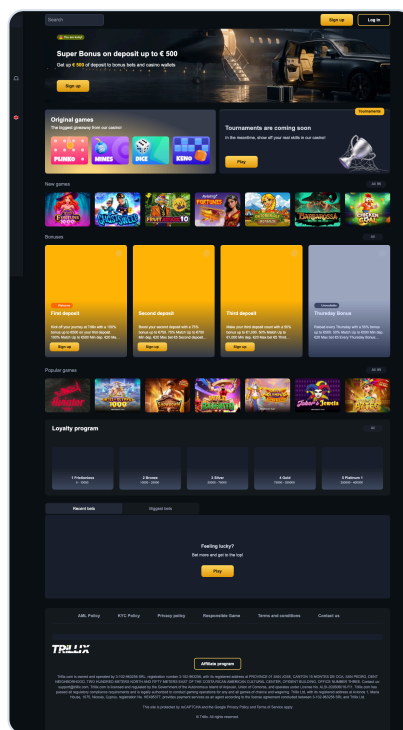

SPANISH EXISTS, ARGENTINE SPANISH DOES NOT

The platform detects the Argentine visitor and lists Spanish as the country language, yet opens in English; a browser set to Argentine Spanish gets English too. Spanish is one click away on the flag selector, with Russian and French.

- **Neutral Spanish, usted form.** "¿Se siente afortunado?", "muestra tus verdaderas habilidades". The Argentine-native competitor writes "jugá, depositá, ganá" throughout, and so do the affiliate teams who write the creatives.
- **English leftovers on the Spanish site.** All three banners ("You are lucky! Super Bonus on deposit up to € 500", "You are a VIP!", "Fast & secure!"), the bonus names (First deposit, Second deposit, Thursday Bonus), "Login now", "Bet more and get to the top!", the legal menu (AML Policy, KYC Policy, Privacy policy, Responsible Game, Terms and conditions) and every legal page.
- **Spelling.** "Regístrarse" (should be Registrarse) on every page and in the bonus modal title; "Proximo" (Próximo) on the main button of sign-up.
- **Home page order.** Banners, then "Original games" (platform originals: Plinko, Mines, Dice, Keno, Limbo, Crash), then New games, Bonuses, Popular games, Loyalty, Recent bets. The Argentine home page opens on the crash row (Aviator, Chicken Road, Ice Fish) and the Argentine slots; the originals row can follow.
- **Mobile.** The phone layout works: sticky bottom bar with menu, games, search, login and sign-up; bonus cards scroll full width. Same English banners.

Spanish home page on a phone: English banner, "Regístrarse", euros.

English home page: banners, originals, new games, bonuses, the popular row, loyalty, bets feed, footer with the seal.

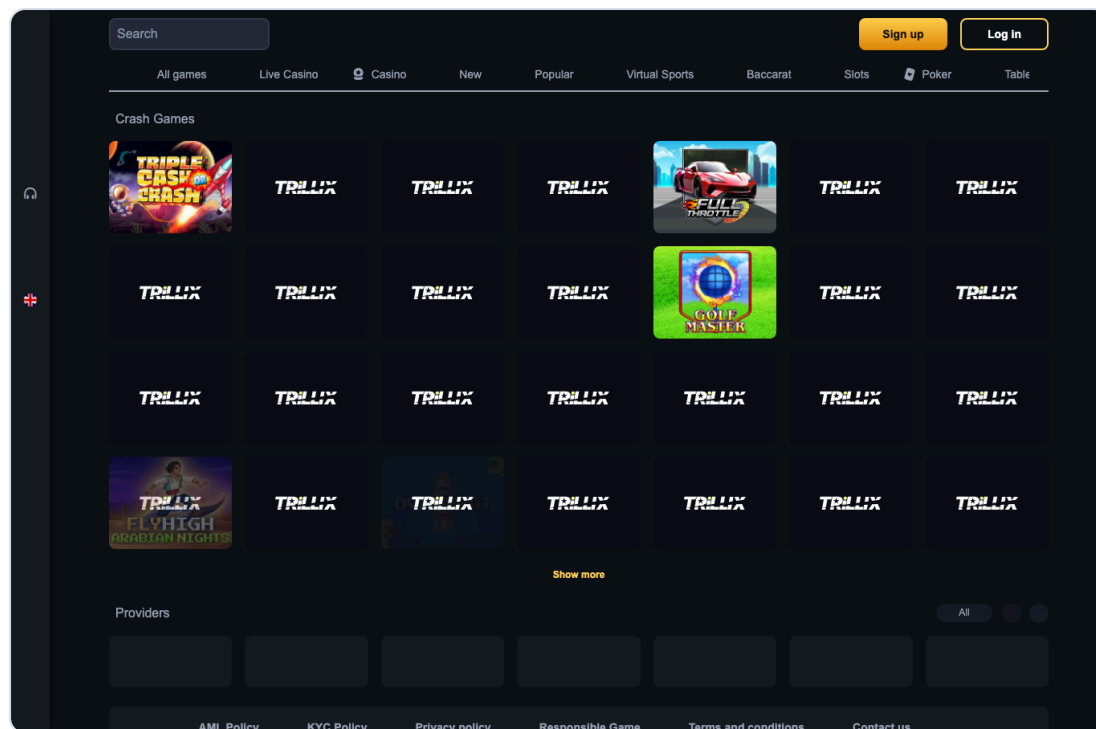

THE ARGENTINE FRONT ROW IS ALREADY HERE

17,079 games from 108 studios are served to the lobby; 524 of them are blocked for Argentina by their studios (Habanero and EGT Digital, plus 4 Evolution tables), none of them front-row titles. Demo play is open to guests, which pre-landers can use.

ARGENTINE FRONT ROW	ON TRILLIX	NOTE
Joker's Jewels, Gold Party, Gates of Olympus 1000, Sweet Bonanza 1000, Sugar Rush 1000 (Pragmatic Play)	5 of 5	All live; Gates 1000, Joker's Jewels, Sugar Rush 1000 and Sweet Bonanza 1000 already sit in the popular row. 663 Pragmatic slots and 342 Pragmatic live games in total.
3 Oaks hold-and-win; TaDa (Jackpot Joker, Fortune Garuda, Fortune Gems); PG Soft Fortune Tiger, Ox, Rabbit	Yes	3 Oaks 109 titles, TaDa 274, PG Soft 168; Fortune Tiger, Rabbit and Ox are in the popular row. RubyPlay is absent, not a gap.
Aviator, Chicken Road, Ice Fish, Balloon, JetX, Mines, Plinko, Aviatrix	8 of 8	Aviator is the Spribe original (RTP 97%), launched in pesos through Spribe's own launcher. Chicken Road is the InOut original in six versions (RTP 98%), Ice Fish too. Balloon from Spribe and SmartSoft, JetX, Space XY, Spaceman, five Aviatrix titles, plus the platform's own Crash, Mines and Plinko originals.
Mesas en Español, Crazy Time, game shows	Partly	19 Spanish-dealer blackjack tables (Evolution), Spanish Roulette and EZ Dealer Roulette Latina (Ezugi), Crazy Time, Lightning Roulette, Ice Fishing, Monopoly Live. No Spanish row in the lobby and no Spanish Pragmatic tables.

What the lobby does with it

- **No crash row in the menu.** The menu lists Live Casino, Casino, New, Popular, Virtual Sports, Baccarat, Slots, Poker, Table Games, Blackjacks, Roulette. The Crash Games category exists (242 titles) at a hidden address and opens on studio filler (Chicky Run, Beach Party, Full Throttle) because it is sorted by studio weight; Aviator is in the category but not on the first screen.
- **Chicken Road is filed under "Other".** The game Argentines call "el pollo" is not in the Crash category at all.
- **Tournaments are off** ("coming soon"); the platform supports them and the studios fund them (Pragmatic Drops and Wins, Aviatrix tournaments ran an ARS 4bn pool on the native brand).
- **Fix.** A Crash entry in the menu with a curated order (Aviator, Chicken Road, Ice Fish, Balloon, JetX, Mines, Plinko, Aviatrix, Space XY), Chicken Road moved into it, a "Mesas en Español" row under Live Casino, tournaments switched on. All of it is lobby configuration.

The Crash Games category as it opens today: studio filler first, Aviator below the fold.

THE LEGAL LAYER IS DONE. THE TRUST LAYER IS THIN.

- **Licence.** Footer names the operator (3-102-963256 SRL, Costa Rica), the Anjouan licence ALSI-202606016-FI1 with a seal that validates on the regulator's site, the payment agent (Trillix Ltd, Cyprus) and an 18+ mark. That is what affiliates, ad networks and payment providers check first.
- **Own terms.** Terms dated 1 July 2026 for the right company and licence, with a VPN clause, KYC before withdrawal, self-exclusion by e-mail within 24 hours. Privacy policy, responsible gaming, AML and KYC pages exist and match. All in English only.
- **Support.** A chat assistant widget ("Trillix Assistant") on every page, a Live chat menu entry, a contact form with a 24-hour promise and support@trillix.com. No WhatsApp line, no Telegram. Argentine players ask on WhatsApp.
- **Payout times** are not published anywhere; the standard attack on offshore brands is "cannot withdraw". Publish Mercado Pago and USDT payout times and hit them. Verification is a document upload (ID or passport plus selfie) with clear rules, which is fine.
- **Payment logos** are missing from the footer of the casino (the affiliate landing shows crypto icons only).
- **Domain blocks** are routine in Argentina (537 sites in one order in July 2026). Mirror pool, APK and PWA, and a WhatsApp or Telegram re-engagement list are launch prerequisites.

THE AFFILIATE LANDING IS THE VENDOR'S TEMPLATE

- **partners.trillix.com** publishes revenue share 25% / 30% / 35% / 40% by monthly net revenue (\$0 to 5,000 up to \$25,001+), "CPA and hybrid available", no negative carryover. Eight of nine FAQ answers are Lorem ipsum. The Spanish version translates the buttons only. The banner reads "100 Free spins + Secret Daily Bonuses", which no page on the casino offers.
- **The landing's legal pages** are an older template: a Curaçao company and licence that are not Trillix's, "support@" placeholders, and Argentina in the restricted-country list. The casino itself serves the correct terms; the landing does not.
- **affiliates.trillix.com** (the back office) has open sign-up with login, password and e-mail; dashboard with signups, first deposits, deposits, withdrawals, bonus, GGR, NGR and FTD rate; reports including postback history and sub-affiliates; media and campaigns; a commission plan per affiliate; five postback URLs (registration, first deposit, CPA, repeated deposit, NGR and revenue share).
- **To confirm inside the admin** before any link goes out: link format and click-ID macro, sub-ID depth, deposit amount and currency in the postbacks, who approves affiliates, landing-page management, the affiliate terms (a draft exists in the CMS, dated 29 May 2026, not published).

WHAT TO BUILD, IN ORDER

#	ITEM	OWNER	WHEN
1	Spanish auto-open and ARS pre-selected for Argentine visitors; pesos in every bonus, banner, limit and help text	Trillix product	Before traffic
2	Minimum deposit ARS 5,000 on every method and bonus; quick amounts 5,000 / 20,000 / 50,000	Trillix product + PSP	Before traffic
3	Argentine welcome ladder in pesos (total cap at the ARS 600,000 market standard), x30 to x35 over 30 days, crash pack and casino pack; Thursday reload gated on 3+ deposits; weekly cashback	Trillix promotions, our input	Before traffic
4	Real-money rail test from an Argentine device: Mercado Pago, CBU/CVU, USDT TRC-20, deposit and withdrawal; success per rail written down; payout times published; the 8% unwagered fee reviewed	Trillix payments, our test	Before traffic
5	One-screen sign-up: bonus cards and form together, ARS and +54 pre-filled, offer in pesos on the form	Trillix product	Before traffic
6	Argentine voseo copy; banners, bonus names and legal pages translated; "Regístrarse" and "Proximo" fixed	Trillix content, our review	Before traffic
7	Crash row in the menu, curated order, Chicken Road moved into it; "Mesas en Español" row; tournaments on with provider-funded events	Trillix product	Before traffic
8	Mirror pool, APK and PWA, block runbook; load time measured from Argentina	Trillix tech	Before traffic
9	Affiliate surfaces: landing rebuilt (terms, FAQ, Spanish), affiliate terms published, postbacks with amounts, link format and sub-IDs confirmed, admin access for us	Trillix affiliates, with us	Before traffic
10	WhatsApp support in Argentine Spanish next to the chat widget, payment logos in the footer, 18+ gate, deposit limits, loyalty store priced in pesos, Levels page fixed	Trillix support	Month 1
